

Construction Update June 6th

Work is well under way!

The Village of Algonquin is excited to kick-off the construction phase of this project and upgrade the park infrastructure to better meet the needs of our residents. Improvements include:

- New multi-age playground and challenge course
- New monument sign and baseball themed entryway signage
- New lighting throughout the park
- Improved soccer field and walking paths
- Upgraded baseball facility with modern amenities and landscaping
- Upgraded concession and restroom facilities
- Parking lot resurfacing

Over the last two weeks the contractor installed the underdrains for the baseball fields and playground. Underdrains are a drainage feature that is installed underground to collect subsurface water and transport it to designated on-site drainage basins to prevent flooding.

This week, the contractor will continue work on the building foundations and plumbing connections. Playground installation is also anticipated for this week as well as continuing to install electrical conduit for the new baseball facilities.

Underdrain installation
